

C O P Y

APR 1962

Dear Charlie,

25X1A

I am giving this to [REDACTED] and asking him to talk to you about it.

25X1A

As you know we are at the end of the line here and don't and can't get a damn thing.

I know you did have items that were not being used and if you are not going to use them I would like to get them here for use in [REDACTED].

25X1A

1. Dayton Processor - [REDACTED] had a couple.
2. 70MM printer for the Mark-5. Bill also had one or two of these.
3. 70MM enlarging viewer for the Mark-5 take. This was also at Bill's.

Those items would help no amount here and help us in doing a better job all around. If the project thinks they could give them up and are willing to ship to the 67th RTS we can pick them up on our records.

25X1C

I am asking Earl to check with Art L. and see if we can't be sent direct a copy of the route trace on all [REDACTED] missions. Also we would like to continue getting a copy of the Mark-5 take for each one.

Anything you can do to help Earl along these lines will make us happy.

There is more we would like but these are the items that I feel you might be able to furnish, others I know you can't.

Just,  
Doc

P.S. I do need the following to help my EH-6A operation -

2 each O-11-6000 spools with shipping flanges and shafts. I believe that these would be the most important.

Also would like on loan only 1 each O-11-6000 spool, shipping flanges, shafts and steel box. This we could get from CARD and return it to them when they or you need it.

I need that for training - I'm losing the only people I have with experience on these and need to train new people for the next go.

Thanks,  
Doc
